

A two-day course for adults that will for ever change your approach to dealing with learning and behavioral challenges.

Heal the Child Program

Hastings, MI March 12-13 , 2010 \$190

with Jon Bredal, M.A.

A powerful, step-by-step program that gets proven results with all children!

In this active, hands-on workshop you will learn specific, step-by-step processes that get to the core of the challenges facing children. Through a variety of activities, including infant reflex integration, heart exercises, key developmental movement and whole body repatterning, you will learn how to create significant change for children.

Specific step-by-step protocols that work for:

Dyslexia

ADD/ADHD

Sleep Challenges

Physical Coordination

Speech Difficulties

Autism

Child Obesity

Bedwetting

Sensory Challenges

Fetal Alcohol Syndrome

*For over 20 years **Jon Bredal, M.A.**, has been achieving outstanding results with children. He has worked with pioneers in the field of integrative movement, child development, educational kinesiology, interactive play, and family systems healing. Jon conducts workshops internationally while maintaining a private practice for children and families in Wolf Creek, OR.*

Real Children. Real Results.

"Last year, before I did the activities, I was reading at a 3rd grade level. I was like a robot. This year I'm reading at a 10th grade level. My reading has gotten so much faster and smoother. It's like I'm using all of my brain now."

B.T., Phoenix, OR

"Within two weeks of doing the activities, my toddler went from a child who refused to eat, screamed when his diaper was changed and was unable to sleep through the night to a child who now sits and eats peacefully and sleeps through the night. His constant screaming has stopped."

M.C., Grants Pass, OR

"When I first met him he would literally scream into my face or grab me from behind. He would constantly fidget and never sit still. He would write on everything. Now, he controls his behavior and is much calmer. Now he can sit still, look me in the eye and carry on a conversation, something he couldn't do before. I've noticed amazing changes in him."

R.S., Seattle, WA

About Jon's workshops.....

This is the best course I have ever taken. It was a life-changing experience and I'm sure the impact on my family will be just as powerful. I can directly apply what I've learned for myself and my five year-old twins. U. R., San Jose, CA

This was a fabulous, fun workshop! I loved that I was learning something completely new that I can apply with children. I really enjoyed the focus on helping children in a joyful way to heal and reach their potential. I'm planning to be a foster care parent and these activities will be extremely beneficial. M. J., Vernon, BC

Breakthroughs....

"When my son started school the counselors wanted to medicate him for ADHD. Since doing the protocol for ADHD, he made profound changes. His self-awareness, impulse control and his ability to focus in school has improved his performance both academically and socially. The activities have changed his life. S.T., Everett, WA

My seven-year-old niece was wetting her bed every night. Since going through the process related to bedwetting she has been dry every night since.

M.W., East Grand Forks, MN

As a foster care parent of a boy who had had a very traumatic background, I have been amazed with the results of doing the healing activities. Before, our son could not sit through even one page without constantly getting up and down. Now he is reading at grade level, and can do challenging work that in the past would have been impossible. The activities have improved the entire quality of our family life.

D.L., Seattle, WA

Heal the Child Program

March 12-13, 2010 9:30am to 5:00pm \$190 (\$50 deposit)
